

26 Holistische artsen vinden de dood.

Het totaalbeeld..?

1) **June 19th, 2015** – [Dr. Bradstreet formerly of Florida, and now practicing in Georgia, was found with a gunshot wound to his chest in a river.](#) The small town locals ruled the death almost immediately as a suicide, but many have their doubts. This same day in Mexico, June 19th, 2015, three doctors were traveling to the State Capital to deliver some papers and were reported missing. This is the only case outside of the U.S.. Authorities said they found the bodies, but the families say those bodies look nothing like their family members and they are demanding more proof and more testing. [A sad but riveting article was written about those details here. I also did an exclusive interview with the Bradstreet family](#) as they publicly said I was the only journalist they trusted to talk about the horrific incident.

2) **June 21st, 2015** –Father’s Day, Florida East Coast: Two chiropractors are found dead. Their names are Dr. Baron Holt and Dr. Bruce Hendendal, both fathers. Dr. Hendendal also held a PhD in nutrition from Harvard. Both were presumably healthy and described as very fit. There is still no cause of death listed, for either doctor in the articles we find. [A few people have contacted me about Dr. Hendendal, 67, but admit that they were surprised by his death and still find it shocking.](#) (Update: Family and loved ones of Dr. Hendendal have spoken to the media that they are suspicious of his death and want answers. Interestingly, Dr. Holt (33), lived in North Carolina which is the state where Dr. Bradstreet’s body (the first doctor to be found) was discovered two days prior. Dr. Holt was visiting Jacksonville, Florida, though, when he died there. Dr. Bradstreet (see story #1) was living in Georgia at the time of his death and before that he lived in the neighboring state of Florida. [A few mutual friends of Dr. Holt have contacted me. They are doctors and have shared with me a cause of death](#) that I find rather shocking and cannot confirm, therefore, out of respect for the family, I will not list that here. Both were well loved by their patients, community, friends and family.

3) **June 29th, 2015** – [The beloved holistic Theresa Sievers, MD was found murdered](#) in her home. Her co-worker says she was known as the “Mother Teresa of South Florida.” Her husband and children were in Connecticut at a family reunion when she was murdered. The authorities have been investigating for two weeks “around the clock,” and now say that she was targeted. Her murder was not random nor was it a home invasion and when the facts come out “...books and movies will be written about it.”, it’s that big of a story. [On the very same day, June 29th, Jeffrey Whiteside, MD, a pulmonologist, went missing- vanishing when he simply “walked away”.](#) Dr. Whiteside, known for his successful treatment of lung cancer, disappeared in Door County, Wisconsin while vacationing with family. He was on foot and numerous reports have called it “mysterious,” saying he vanished without a trace. They’ve been searching now for three weeks and even colleagues have joined in (along with bloodhounds, drones search parties, and helicopters) but not one shred of evidence has surfaced. (UPDATE: Two [arrests were made in the death of Teresa Sievers and one of the assailants called himself the “Hammer”](#) on Facebook (Dr. Sievers was allegedly killed with a hammer). The other was one of her husband’s childhood friends who was just recently

extradited to Florida. His attorney says there is evidence to show he had no involvement whatsoever with the crime. Her husband, Mark Sievers, has not been arrested at this time.

4) **July 3, 2015** – [Patrick Fitzpatrick, MD goes missing](#). He was traveling from North Dakota to neighboring Montana (which he did often as his son lives there) and his truck and trailer were found on the side of the road. The search has expanded but authorities say it's as if he vanished without a trace. He's 6' tall and described as Irish-looking with a goatee (details can be found in the links).

5) **July 10th, 2015** – [Lisa Riley, 34 years old, DO \(Doctor of Osteopathic medicine\) is found in her home with a gunshot wound to her head](#). Her husband who found her and called 911, has a prior record. He was previously charged with the attempted murder of his ex, Ms. King, before charges were eventually dropped. Evidence showed that there was gun residue found on Ms. King's hand and not Mr. Riley's. Riley's story corroborated this, but King's allegedly didn't, and her story kept changing (click link in this paragraph for their story with details on all of this). Mr. Riley has since been charged with the death of his wife, Lisa Riley. We'll see what happens in court.

6) **July 19, 2015** – A month to the day after the first doctor (Jeff Bradstreet, MD) was found dead with a gunshot wound to his chest, [Dr. Ron Schwartz was found murdered in his E. Coast Florida home](#). Sadly, he was shot to death. We don't know if he was holistic, but he was licensed and lived between Florida and Georgia. He was a gynecologist who lived in an unincorporated part of Jupiter, Florida on a few acres of land and there are reports he ran an organic lawn service on the side.

7) **July 21, 2015** – Dr. Nicholas Gonzalez, a holistic MD, dies suddenly. **The same day another holistic doctor is also found dead (see below)**. Both of alleged heart attacks, though their own friends and family say publicly it doesn't add up. I had met Dr Gonzalez and his amazing wife, and my better half has interviewed him several times. His official website says that while they initially thought it was a heart attack, his autopsy does not support that belief and shows no heart attack. They are awaiting further tests. "Dr. Gonzalez was in excellent health otherwise so his passing is quite unexpected." It is reported that he was alone at the time of his death. Countless people every week (including close friends) write me questioning the fact that he died "naturally". He also said in several interviews (including the last one before he died) that [he thought big pharma wanted him to get hit by a bus or that he might die suddenly](#). Frightening metaphors and a mystery we hope to get to the bottom of soon.

8) **July 21st, 2015** – [Dr. Abdul Karim, an outspoken and loved holistic \(biological\) dentist, 41 years of age, is found dead alongside the road by a passerby](#). He had been preparing for a half marathon and was allegedly out training that night. His old fraternity brother (lifelong friends), friends of many years, and patients said it didn't add up. He was in perfect shape and ate an extremely healthy diet. Mainstream news said he had a "massive heart attack" but many who knew him have written to me with their sincere doubts.

9) **July 23, 2015**- Authorities announce they have found the body of Dr. Jeffrey Whiteside who has been missing for over 3 weeks. Chief Deputy Pat McCarty said at the news

conference on Thursday that a .22 caliber gun was recovered at the scene. Investigators believe the body was there for “some time”.

10) **August 12, 2015** – [Osteopath Mary Bovier is found slain to death in her home](#) in Pennsylvania. Her significant other, who we are told is also an osteopath, was questioned and released. At this time there have been no arrests and there are no suspects.

11) **August 18, 2015** – I report that [Jeffrey Whiteside’s death is officially ruled as a suicide](#). But the local press calls the investigation a “mess” (described here in detail). Many are shocked at how long it took for details to emerge and countless people write me with their doubts. Even local authorities were asked by the local press if they’d heard of my stories. They admitted they had, but hadn’t been contacted by the feds on the case.

12) **September 7, 2015** – [I broke the news to the health community of 29 holistic doctors \(also referred to in the German press as homeopaths/ND’s/psychiatrists\) who were found poisoned](#) by an overdose of a hallucinogenic drug. I’ve done several updates of the articles, using a German translator, but the whole story of what really happened has still not been revealed. One thing most can agree on; it was a large overdose and mainstream German news reports that some were in “life threatening situations” when dozens of ambulances and a helicopter arrived to the chaotic scene. The good news? All lived and have allegedly made a full recovery (though some had to be restrained for their safety for some time).

13) **September 16, 2015** – I reported that our colleague, [best selling author and holistic MD Mitch Gaynor, is found dead outside his country home; an hour or so from Manhattan where he practiced](#). We knew Dr. Gaynor and had just finished an advanced copy of his book that he had sent to us. It was quickly called a suicide by the local sheriff. The NY Times wrote me asking for details and we had a nice exchange. Even though I have gently broken the news on this and many other stories, the NY Times fails to source me (I didn’t expect them to source HealthNutNews, though the Guardian UK and other mainstream sources have for some time). UPDATE: Mitch Gaynor MD had been on RT not long before he died. [We wanted to contact them for comment, but soon after Mitch was found dead? the founder or RT was found dead in his Washington DC hotel room](#).

14) **Sunday October 11th** – [We announce that Dr. Marie Paas is found dead of an alleged suicide](#). She was well known for her animal advocacy. People on her Facebook page seemed shocked and in disbelief about her death. Unlike the 3 others by this date who were alleged suicides (one who has been officially confirmed) we don’t know the location where Dr. Paas was found, nor the details of her alleged suicide. Many seem concerned for her pets, who they say she loved very much

15) **October 29th 2015**, Jerome E. Block, M.D, **jumped to his death from Central Park West residence**. Authorities say Block jumped from the 20th floor of his residence around 9:30 a.m. [Details and video can be found here](#).

16) **2015 dozen plus accidental deaths and freak accidents, mostly holistic doctors**; Besides the 13 doctors covered thus far who died in non accidental deaths, we have [5 chiropractor deaths](#) that were accidents. We also have more deaths of doctors here: [some described as freak accidents](#). Again, we didn’t include them in the official unintended series. We have

the [famous holistic ABC News doctor, Jamie Zimmerman, who allegedly slipped and fell](#) and hit her head in Hawaii while on vacation, and who was carried out to sea. We also have [more accidental deaths of holistic doctors here in NY \(accidental\)](#), and yet [another here](#) . We literally couldn't keep up at times there were so many. And yet another holistic MD found dead which I wrote about [here](#). It doesn't stop.

17) **Late December 2015 – January 2016** I didn't include PhD's in the series (unless they were also an MD, DO or DC) but then just this past few weeks we saw 2 Canadian PhD's/researchers killed. [One was stabbed in what his friends called a safe neighborhood](#) Another, [a Phd \(who was a wife and mother of two\) was hit while jogging near the beach and then buried in a shallow grave](#) on the **tourist island of Grenada**. Then **days later a holistic doctor is also attacked there with his wife (physician's assistant) in this same tiny island of Grenada. (see #18)** This is where we suddenly start seeing a spate of cancer researchers killed which hadn't happened previously and then suddenly we have a one every few days.

18) **January 23, 2016**, A top MD, John Marshall, 49, who was a former 4th generation marine, had served in Afghanistan, and had survival training, was found dead in the Spokane river and they pulled his body out that day. He was said to be in great shape, was doing his usual run in Seattle near a river. [Authorities say he somehow must have fallen into the river and drowned and almost immediately said it was death by drowning](#). **UPDATE! Dr Marshall's wife (also a doctor and surgeon) has hired her own investigator and is questioning the quick call by Seattle PD. Again, more families are questioning these deaths and what some find absurd rulings by authorities.**

20) **January 25th, 2016** [Our own friend of ten long years, holistic doctor Rod Floyd, was found dead at his home here in Florida. He lived a matter of miles from us and I'd been to their home as they'd been to mine](#). It was definitely not suicide in any way and **his wife of 37 years says he was "hearty and healthy" and calls it an accident**. That's all I'll elaborate right now, as even I don't know all the details. Dr Floyd did buy a sauna from me (but that wasn't involved in his death which I was told initially) Besides being a chiropractor, **Dr Floyd was also a clinical professor at Palmer Chiropractor College near where we live. He and his wife also had run the Natural Awakenings magazine for some time. Our whole community is shocked and saddened by his death.**

21) **January 26, 2016**. Believe it or not [just a few short weeks later, a holistic MD and his wife \(a physician's assistant\) were attacked, while on a relaxing beach stroll, by a sword wielding man in the same place- the tiny island of Grenada](#). **The holistic MD survived**. Sadly his wife was murdered and raped by the machete wielding attacker. Both perps in each attack of the doctors in Grenada in a couple of weeks are reported to have been recently released from prison and in both crimes (allegedly unrelated) the men just nonchalantly turned themselves in after the crime. Some experts have their theories on this. I won't elaborate at this time. Grenada locals are shocked and say they've never seen anything like this- let alone twice in a row.

22) **January 28th, 2016** The new spate of cancer researcher/doctors who are killer or found dead doesn't slow down and **this might be the strangest of them all: [Yet another cancer](#)**

[researcher, Professor Alan Clarke, 52, was found dead in the wood in hanging from a tree in a rubber body suit on December 28th, 2015 and they ruled it accidental.](#)

23) **February 1, 2016** Just a week later, to the day, after losing [our local friend and holistic doctor; Rod Floyd](#) we lost another local friend also right here in our same local holistic community. [The wonderful young Paige Adams FNP, B-C, also lived just up the road here locally in Florida was found dead at her home.](#) She had worked closely for many years with her good friend and colleague Dr. Bradstreet. The problem is Dr. Bradstreet started off this whole holistic series when he was found dead in a river. Now we have his close friend (and our friend!) and his colleague of many years found dead. She was so young so this is particularly heartbreaking. Paige Adams had asked to stop by the house to see us days before she died. I feel awfully for not taking her up on that, and my heart goes out to her family and patients. She is the only one in this entire series I've ever written about who is not a doctor of some sort (DC, MD, DO, and even a PhD at the end) But she was a board certified Nurse Practitioner whose patients rave about her endlessly. **She also stated publicly (which you'll see in the link) that if anything happened to her don't assume it was an accident.**

23) **February 14, Valentine's Day.** [Cancer HIV Researcher in Seattle- Cheryl Deboer is found dead in a culvert with a plastic bag over her head.](#) Investigators oddly quickly they can't see any evidence it's a homicide, but her mother and other relatives state publicly there is no way she crawled 1.5 miles through brambles and water and mud to put a plastic bag over her head in a culvert. They stated that if she would have wanted to take her life (and listed plenty of reasons why she wouldn't with a happy family and job at the famous cancer research lab) she could have done it much more easily. **The general public tends to agree with the family. Families are now starting to question these ridiculous statements called so quickly by local authorities. Some are hiring their own investigators and doubting local authorities. Many are wondering if the local authorities are to be trusted.**

24) **March 10, 2016** [Yet another cancer researcher found dead in a field. He was only 34,](#) and found in a safe quaint area in the countryside and people are astounded. Nearly immediately authorities announce his death is 'not suspicious', but there is a public outcry of how that could be so. We still have zero answers as to his cause of death.

25) **March 23, 2016** Wednesday, Triple homicide: [Prominent Holistic doctor Henry Han, was found murdered in his 7 acre Santa Barbara Estate along with his wife and daughter, only 5 years of age. All were shot and murdered and wrapped in plastic.](#) Quickly an arrested is made of a young man who has no priors who lived with his father oceanside in Santa Barbara. His father was EX CIA. We will update as details emerge.

26) **April 6, 2015** Dr Harsch, 59, a self described holistic medicine MD was killed while riding his bicycle with a group of friends. He was the only one hit and none of the others were injured whatsoever. [See details here.](#) (Editor's note: We had another holistic doctor earlier in the series also killed on a bicycle ride last year and many of her friends and loved ones contacted me about their concerns and questions on her death.
